Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Talbert (US Patent No. 4,781,870).

Talbert discloses a strengthened mirror structure comprising a reflection mirror having a reflection surface (Fig. 3, A) and a back surface (B), at least a strengthening element stuck on the back surface of the reflection mirror (see B) through an adhesive (column 5, lines 25-27), the reflection mirror is large reflection mirror (see title of the invention) or a small reflection mirror (the prior art meets this limitation because the word "small" is not defined any different than the prior art mirror), the adhesive is glue and twin adhesive (30 and 32) and the strengthening element is a honeycomb plate (26). The strengthening element is smaller than the reflection mirror (see Fig. 6b and Fig. 7).

Art Unit: 2872

3. Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Stang (US Patent No. 4,124,277).

Stang discloses a reflection mirror (Fig. 2, 12) having a reflection surface and a back surface, at least a strengthening element stuck on the back surface of the reflection mirror through an adhesive (see Fig. 2), wherein the strengthening element is aluminum honeycomb (column 4, lines 49-51).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Talbert.

Talbert discloses the claimed invention as set forth above except that the strengthening element is wider than the reflection mirror so as to form fixing ends. It would have to be obvious to one of ordinary skill in the art to make the strengthening element to be wider than the reflection mirror for

the purpose of providing increased support for the edges of the mirror.
